

Stolen equipment and lost data are costing businesses globally billions each year.

A black and white photograph of a man standing in a wooden barrel in an office. He has a distressed expression, with one hand on his forehead. The office furniture, including a desk, chair, and another chair, is shown as dashed white outlines, indicating they have been stolen. On the wall, there is a calendar and a line graph titled "Company Stock" showing a sharp decline. A window with blinds is visible in the background.

Loss Report

Desk.....	\$345.00
Monitor.....	\$750.00
Computer.....	\$1,725.00
Laser Printer.....	\$920.00
Laptop.....	\$2,450.00
Lost Data.....	\$2,000,000.00+

DID YOU KNOW...

The true cost of computer and data theft can run into the thousands of dollars - losses due to downtime, lost employee productivity, administrative overhead, etc.

- 330 IT decision makers in UK, France and Germany estimated businesses losses of euro 1.2 billion across the E.U. if companies lost computer data.

- *Omega International Survey - The Times, February 2000*

- The average corporation spends more on coffee and soft drinks than on computer security.

- *Internet Security Systems*

- 66 percent of respondents reported financial losses totaling \$66,708,000 due to theft of proprietary information.

- *2000 CSI/FBI computer crime & security survey*

Access Control

Safeguard Your Data!

The theft of all types of electronic equipment is on the rise. Equipment theft is costly, but the hardware is replaceable. What about your valuable data?

Personal Access - PC Power Lock™

Protect your valuable data and keep your files private! This is a foolproof, tamper-proof way to assure ONLY YOU gain access to your PC or Mac.

The Personal Access PC Power Lock™ device is designed to limit use of your computer by controlling access to the power. You simply install it into your PC's power plug, and instantly a key controls who gets to use your computer. No software and no encryption required! When you go to a meeting, to lunch, or leave your office for the day, a simple turn of the key prevents unauthorized use of your system.

Easy to install - plugs into computer's power port

The Personal Access PC Power Lock™ works on ALL PC or Mac desktop and tower computers.

Installs permanently with our patented retainer clip

The PC Power Lock™ has an extra long 6 foot cable so that you can place your lock in a convenient, easy to use location. Once installed, you simply turn your system ON and OFF with a key. Master keyed and keyed alike versions available - see back panel.

#15101

Power Source
"Deadbolt" Security!

Why put yourself at risk?

Your data is the most important part of your computer. Protect your investment with the **Personal Access PC Power Lock™**.

The PC Power Lock™ protects against:

- Unauthorized use of your system
- Copying of your data
- Data theft
- Data tampering
- Virus infection

LIFETIME WARRANTY
Satisfaction Guaranteed!
Ready To Install
No Software Required!

DID YOU KNOW...

There is a 50% chance that computer theft will occur in your office vs. on the road.

- CSI/FBI Computer Crime and Security Survey

Specialty Security Solutions

Steel Lok Cable System™ - #10401
Patented 5/16" braided steel cable system provides ultimate theft protection. Steel-Lok™ plate has a bonding pull strength of up to 1500 pounds.

Steel Lok I™ - #11003
Patented hardened steel enclosures provide the ultimate in theft protection. Industrial strength adhesive and/or screws secures the Steel-Lok™ to any surface withstanding over 700 lbs of pull force. Master keyed and keyed alike versions available - see back panel.

Chassis Lok™ - #12501 (2 pack)
Heavy duty chassis lock prevents memory and component theft by limiting access to chassis screws. High security lock is pick and drill resistant with over 50,000 different key combinations available. Master keyed and keyed alike versions available - see back panel.

Cable-Trap™ - #02001
Simple but effective security for mice, scanners, speakers, and other peripherals. Easy to install security device traps the cables of up to five devices without interfering with their use! Master keyed and keyed alike versions available - see back panel.

File Lok I™ - #03104
Prevents unauthorized copying of data from your network or hard drive. Secures most 3.5" as well as some CD ROM, and Macintosh floppy drives with flat bezels. Master keyed and keyed alike versions available - see back panel.

File Lok II™ - #03106-BLK, #03107-PTY
Prevents unauthorized copying of data from your network or hard drive. Secures virtually all notebook and desktop computers with a 3.5" disk drive. Master keyed and keyed alike versions available - see back panel.

File Lok III™ - #03111-BLK, #03113-PTY
The ultimate in drive security. Heavy duty lock is pick and drill resistant with over 50,000 key combinations available. Works with virtually all notebook and desktop computers except Macintosh. Master keyed and keyed alike versions available - see back panel.

- 387,000 notebook computers were stolen in the U.S. in 2000 - losses exceeded \$775million.

- Safeware 2000 Loss Study

- 60 percent of companies surveyed noted theft of notebook computers in the last 12 months.

- 2000 CSI/FBI computer crime & security survey

- In the U.K. computer theft accounts for 30 percent of all robbery loss. Laptop & computer theft costs U.K. business more than £250 million a year.

- Association of British Insurers & The Times, August 2000

Quality accessories you can use to expand or customize your security solution.

All Qualtec cable kits can be customized to fit your needs. Simply add any of the accessory products to an existing kit, or create your own custom configuration. Select any combination of components, lock type and cable type. Cables can be customized to the exact length needed at minimal cost. Visit our web site at www.qualtecsecurity.com for details.

Build Your Own
CUSTOM SECURITY KIT

Custom Kits

Select any of the accessory components to create your own personal configuration.

Custom Cables

In addition to our standard cable lengths, we can customize the length of cables from 6 inches to what ever length you want.

Keying Options

All Qualtec security products ship keyed different - where every lock is keyed to a unique combination. Keyed alike and master keyed versions (see explanations below) of the products in this brochure are available through special order.

Keyed Different

Every lock is keyed to a unique combination.

Keyed Alike

Two or more locks can be operated with the same key. (Available through special order only)

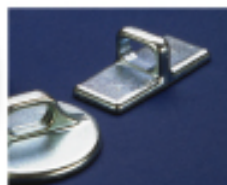

Master Keyed

All locks are operated by individual keys and a master key. (Available through special order only)

To order keyed alike or master keyed versions of the products in this brochure, contact your local Qualtec distributor, or directly at 800-999-2983, or on the web at www.qualtecsecurity.com with your requirements.

Accessories

Pad-Lok-II™

Super Bond™ Plates

Super Bond™ security plates that can be used to expand PC Security, Notebook Security™ and Memory/CPU Security™ products. Includes Super Bond™ adhesive.

Item	Kit Contains
05403	1 - 1.75" round plate, 1 - .75x2" rectangular plate and adhesive
05404	2 - .75x2" rectangular plates and adhesive
05405	2 - 1.75" round plates and adhesive

Peel and Slick

Adhesive Plates

Item	Size
05108	1 - 3.5" x 4" plate
05109	1 - 2.5" x 3.25" plates

Cable-Lok™

Eye to Eye Security Cables

Extra putty security cables can be used to expand your security system. Features a metal eyelet fitting at each end. Custom cable lengths are available at minimal charge.

Item	Length
04106	3'
04107	5'
04117	7'
04108	10'

Cable-Lok™

Eye to Ball Security Cables

Similar to the above eye to eye cables, except one end has a ball stop to keep the cable from passing through either the eye or other security fasteners/plates. Custom cable lengths are available at minimal charge.

Item	Length
04113	3'
04115	5'
04118	7'
04119	10'

Uni-Housing™

Mounts to cover screw hole. Features twist-proof design. Ideal for leased machines.

Item	Size
09110	1 - Uni-housing (use cover screw holes) plus hardware

BOTTOM LINE BENEFITS OF SECURING YOUR EQUIPMENT

- **Asset Management** - Secure equipment means you know where your assets are and that they cannot be removed without your authorization.
- **Loss Prevention** - By deterring opportunistic theft, it ensures that computers, presentation projectors, printers and other expensive office machines stay where you need them.
- **Data Protection** - Power control limits who has access to the PC, the ultimate data protection. Locking drives protects sensitive files and personal information against data theft.
- **Risk Management** - Reduces risk of loss due to theft, accidental breakage, misuse or misappropriation of proprietary data.
- **Network Security** - PC-level power control, passwords and log-in scripts are additional lines of defense against network security breaches.
- **Allocation Control** - Absolute control over who gets or relocates equipment and how it's protected. A side benefit is that secured equipment provides an opportunity to review proper handling and security procedures with employees.
- **Improved Profitability** - For every notebook protected from theft, you are saving \$8,000 - \$10,000 in equipment related replacement and configuration costs, not including costs associated with lost productivity due to downtime.

What You Should Be Protecting

- Notebook/laptop computers
- Mobile printers, scanners and storage devices
- Desktop computers
- External drives and storage devices
- Network hardware
- Phone switches
- Multi-function machines
- Laser and Digital Print systems
- Copiers
- Fax machines
- Audio/Visual Equipment
- Portable and office presentation projectors
- Conference phones
- Video conferencing equipment
- Computer speaker systems
- LCD Flat Panel Displays
- Monitors
- Digital Cameras
- Projection Systems
- Amplifiers and stereo equipment
- MP3 decoders, players and recorders
